DETAILED ACTION

EXAMINER'S REASON FOR ALLOWANCE

Allowable Subject Matter

Claims 27-40 are allowed over the prior art of record as submitted in the 7/10/2007 reply. Examiner also acknowledges the drawing replacement for Figure 2.

The following is an examiner's statement of reasons for allowance: The claims in this application have been allowed because the prior art of record fails to disclose either singly or in combination the claimed medical catheter device for insertion into a blood vessel with an elongate catheter tube and delivery lumen with a distal end wall portion defining opposing longitudinally extending ridges and a peripheral arc segment that each ridges forms, the ridges having outer ridge surfaces with multiple longitudinally spaced lateral channels therein, with ridges to engage and retain interior wall portions of a blood vessel for support of the vascular wall.

The closest prior art of record is Lotito et al. (7,090,654) and Twardowski et al. (5,5569,182), however these references do not disclose the medical catheter device as claimed or described above.

Regarding claims 27 and 39, the closest prior art of record fails to teach among all the limitations the medical catheter device with the ridges with outer surfaces and lateral channels for minimizing collapse of the vessel and for occlusion of the fluid port.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
